

MEMORANDUM

DATE: September 29, 1986
TO: Ken Mensing - Collinsville IEPA
FROM: Jeff Larson, Project Manager
SUBJECT: L1630200005/St. Clair
Sauget/Sauget Sites
Superfund/General Correspondence

On the evening of September 23, 1986, Kari Luly, Dan Sewell from E & E and myself attended a City Council meeting in Cahokia. At this meeting we presented the public and council with a synopsis of the progress made on the Sauget/Dead Creek project. We asked for public input as to when private residential wells are located and historical details concerning the area of the project. After the meeting local citizens spoke to us in the parking lot about continued dumping of "chemicals" in the area from tanker trucks. Attached is a map which identifies the area described by the individual. Ken, we need your assistance in performing some visual inspection work. If there is continued dumping in the area we should contact the DCI to perform some undercover work. I don't want to bring them into this unless we are relatively sure that some illegal activity is occurring. Please let me know if there is any validity as per these activities.

Sincerely,

Jeff Larson, Project Manager
